Fifth-year Information & Communication Engineering student, full-stack developer, and Backend Developer Intern at the Cambodia Council of Nurses. Experienced in secure NestJS APIs, authentication and notification workflows, responsive interfaces, relational databases, real-time systems, testing, and collaborative Git delivery.

EDUCATION

Engineer Degree Program
Information & Communication Engineering

Institute of Technology of Cambodia

2022 — Present · Year 5

TECHNICAL SKILLS

Frontend

Vue 3, React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Phaser

Backend

NestJS, Node.js, Spring Boot, Java, Laravel, REST APIs, Socket.IO, JWT

Data

PostgreSQL, MySQL, Sequelize, Prisma, TypeORM, Redis, Flyway

Tools

Git, GitHub, Docker, Jenkins, Postman, Linux, Maven, Vite

STRENGTHS

Responsive UI development

API design & integration

Real-time applications

Team collaboration

EXPERIENCE

Backend Developer Intern

2026 — Present

Cambodia Council of Nurses (CCN) · Phnom Penh

- Develop and maintain NestJS APIs for authentication, OTP and password recovery, JWT sessions, role-based access, and web/mobile integration.
- Improved personal and actionable-work notifications for Workflow, CPD, and Presentation processes, including unread counts, read-state handling, and real-time delivery.
- Diagnosed a polymorphic notification-reference database constraint, delivered repeatable PostgreSQL remediation, and verified critical behavior with Jest, Postman, and production builds.

SELECTED PROJECTS

SkillBridge-KH

Full-stack project

Angular 22 · NestJS 11 · TypeScript · Prisma 7 · PostgreSQL 17 · Docker

- Built a student opportunity platform connecting Cambodian university students with internships, project teammates, and beginner-friendly freelance work.
- Developed secure role-based workflows, marketplace discovery, applications, collaboration tools, notifications, moderation, and production-ready deployment infrastructure.

FlowState

GitHub ↗

React 19 · Vite · Zustand · Framer Motion · Web Audio API

- Designed and built a privacy-first productivity app with customizable focus and break timers, task naming, and browser-local session history.
- Created an eight-channel ambient sound mixer and responsive analytics dashboard with weekly activity, averages, and focus streaks.

EnglishPath

GitHub ↗

Vue 3 · Pinia · NestJS · Prisma · PostgreSQL · TypeScript · Docker

- Built a free adaptive English-learning platform with CEFR placement, personalized learning paths, multi-skill lessons, progress tracking, vocabulary, and achievements.
- Developed secure authentication, rotating refresh sessions, curriculum and mastery data, responsive learner workflows, automated tests, and production deployment configuration.
